

Dear our Future Partner,

We are looking for partners for our projects to be applied.

We are planning to apply with 2 projects and for that we are looking for partners with confirmed professional experience (universities, training institutes, NGOs).

We are looking for partners for:

1. Erasmus Strategic partnerships in the field of education and training **KA2** project which is for primary/high school or university students and which would launch a pilot training that would teach children about **meditation and relaxation**, these include, for example internal attention, self-control, body consciousness, and stress management. We would develop application and e-learning training. The deadline of it is **21st March 2019**; the budget would be around **100.000 Euro/partner**. If you have any project material, idea to share please send us! Ecocenter Foundation can submit this program in Hungary and your organization can participate in the project again as an experienced partner.

2. EACEA-51/2018 Civil Society Projects has been launched with the deadline of **2nd of September 2019**. It is high time to find partners and the greatest innovations! The budget would be around **37500 Euro/partner**. If you have any project material, idea to share please send us! Ecocenter Foundation can submit this program in Hungary and your organization can participate in the project again as an experienced partner.

Are you looking for an experienced, enthusiastic and proactive partner from Hungary? Are you intent to submit a project for which you are looking for a partner? Stop searching, we are the one that you are looking for. If you know other organizations which are looking for a partner for their project please inform us.

Ecocenter Benefit Foundation keeps on participating in project proposals again, providing our wide range of experience and significant partnership network that could be used successfully during the projects.

More information on our international projects: <http://www.ecocenter.hu/en/>

Via our wide European network, we also take full responsibility in valorization, dissemination activity and participate in analysis at European level and specifically in Hungary. We have wide connections in Hungary with the public and private sector as well.
